

Mobile Application User Guide

1. Introduction

This mobile application is designed to provide AI-powered voice services, reporting tools, and multi-device support across phones, tablets, TVs, and wearables.

2. Installation

Download the app from the Play Store or install the APK. Open the app and allow required permissions.

3. Signup & Login

Users create an account using email or phone. The system adapts signup based on device type (phone, tablet, TV, smartwatch).

4. Key Features

• AI Voice Assistant • Smart Reporting System • Multi-device Sync • Emergency Access (999/112) • Secure Authentication

5. Multi-Device Support

Users can switch devices during signup. Small screens redirect users to compatible devices automatically.

6. AI Features

The app provides real-time AI chat, voice commands, and intelligent suggestions.

7. Security

All user data is encrypted and authentication is secured using token-based login.

8. Troubleshooting

If issues occur, restart the app, check internet connection, or reinstall the latest version.
