

CLAIMS

What is Claimed Is:

Claim 1 (Independent Claim)

A Sikizwa Voice 360° Personal Safety and Emergency Response System comprising:

- a wearable emergency activation pendant;
- a mobile application executable on a smart device;
- a wireless communication network;
- a location tracking subsystem; and
- a cloud-based monitoring and emergency management platform;

wherein the system is configured to enable a user to initiate an emergency alert, transmit distress information, communicate location data, and facilitate emergency response through the coordinated operation of the wearable emergency activation pendant, mobile application, and cloud-based monitoring platform.

Claim 2

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the wearable emergency activation pendant comprises:

- at least one emergency activation button;
- a rechargeable power source;
- a wireless communication module;
- a microcontroller unit;
- a status notification indicator; and
- an enclosure configured to protect internal electronic components;

wherein activation of the emergency activation button generates and transmits an emergency distress signal to the mobile application and cloud-based monitoring platform.

Claim 3

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the mobile application comprises:

- a user registration and authentication module;
- an emergency contact management module;
- a real-time location monitoring module;
- an emergency notification module;
- a voice communication module;
- an incident reporting module; and
- a data synchronization module.

Claim 4

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the wearable emergency activation pendant is configured to communicate with the mobile application through one or more wireless communication protocols including Bluetooth®, Wi-Fi, Near Field Communication (NFC), cellular communication, or equivalent communication technologies.

Claim 5

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein activation of an emergency alert automatically transmits:

- user identification information;
- geographical location coordinates;
- date and time information;
- emergency status information; and
- device identification information

to one or more designated emergency contacts, monitoring centers, security agencies, or authorized emergency response personnel.

Claim 6

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the location tracking subsystem utilizes Global Positioning System (GPS), cellular triangulation, satellite positioning systems, wireless network positioning, or combinations thereof to determine and transmit the user's location.

Claim 7

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the cloud-based monitoring and emergency management platform is configured to:

- receive emergency alerts;
- store user and incident data;
- maintain location history records;

- generate emergency notifications;
- facilitate emergency response coordination; and
- provide incident tracking and reporting functions.

Claim 8

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the mobile application further comprises an audio evidence capture module configured to automatically record, store, and transmit audio data upon activation of an emergency alert.

Claim 9

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the system further comprises a continuous monitoring module configured to periodically transmit user location and status information to authorized users or monitoring centers during an active emergency event.

Claim 10

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the cloud-based monitoring and emergency management platform is configured to automatically escalate an emergency alert to additional emergency contacts, security agencies, healthcare providers, or emergency response personnel when a predetermined response condition has not been satisfied within a specified time period.

Claim 11

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the wearable emergency activation pendant comprises a water-resistant and impact-resistant housing configured to maintain operational functionality under adverse environmental conditions.

Claim 12

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the system is configured to provide emergency assistance in situations including:

- personal security threats;
- gender-based violence incidents;
- kidnapping or abduction attempts;
- school-related emergencies;
- workplace safety incidents;
- political demonstrations;
- criminal attacks;
- medical emergencies; and

other high-risk situations requiring rapid communication and emergency intervention.

Claim 13

The Sikizwa Voice 360° Personal Safety and Emergency Response System of Claim 1, wherein the wearable emergency activation pendant and mobile application operate as an integrated emergency response platform configured to provide 360-degree personal protection through emergency alert generation, real-time location tracking, evidence collection, emergency communication, and coordinated response management.

Drafted for: Sikizwa Voice 360° Personal Safety and Emergency Response System
Applicant/Inventor: Faith Wafula (Team lead)

Patent Category: Safety Technology, Emergency Communication Systems, Wearable Security Devices, Mobile Safety Applications.
